

Comments and Errata on Atmospheric and Oceanic Fluid Dynamics (6th and later printings)

Geoffrey K. Vallis

August 22, 2011

The following errata and comments apply to the *sixth and later printings* of the book, available from 2011. (These printings say '6th printing, 2011' or similar on the copyright page.) If you have earlier printings of the book, please see the corresponding errata sheet. If you find other errors, or if you think something is poorly explained, please contact the author at 'gkv-at-princeton-dot-edu'.

This errata sheet is incomplete at the moment. Many, but not all, of the errors listed in the 5th edition were corrected, and a number of those remaining are not listed here. So please consult the errata sheet for the 5th printing as some errata there still apply to the sixth printing.

1. Page 102, fig. 2.9. The slope of the Lamb wave is incorrect by a factor of $\sqrt{2}$. To make it correct, draw a straight line from the origin to the value of 5.6 on the frequency axes at the wavenumber value of ± 2.5 . The line should asymptote to the $m = 0$ acoustic curve.
